More than a dozen United States government officials and outside experts were interviewed for this article, and all spoke only on condition of anonymity because they were discussing a classified intelligence document. The officials included one

A quiet revolution in the world of lung transplants is saving the lives of people who, just two years ago, would have died on the waiting list.

In the past 16 months, waits have shortened, lists have shrunk, and the number of lung transplants has gone up. Further improvements are expected.
